Impact on P-12 learning and development

Data on the impact on student learning and development of the College of Education (CED) graduates of 2019-20 and 2020-2021. The data represents CED graduate class average GPA compared to grade level average GPA in the same subject. Table 1 presents the percentage of CED graduates whose classes performs.

The results indicate that the students of graduates/teachers of 2020-21 performed higher than all students of the same grade level. Moreover, the percentage of graduates/teachers of 2019-20 whose classes performed lower than all students at the same grade level was higher than that of the graduates/teachers of 2020-21.

The data seems to indicate that graduates/teachers of 2020-21 had a better impact on their students than the graduates/teachers of 2019-20.

Table 1. CED graduate class average GPA compared to grade level average GPA in the same subject

	Higher than all students		Same as all students		Lower than all students	
	#	%	#	%	#	%
2019-20	3 out of 20	15%	4 out of 20	20%	13 out of 20	65%
2020-21	7 out of 21	32.81%	7 out of 21	39%	5 out of 22	25.20%
