# QU HEALTH AT A GLANCE

Academic Year 2021/2022

# Welcoming Remarks

As the health challenges shift, so too must education and training of future healthcare practitioners. There is a need and an opportunity for health professions education to address the shared health challenges of our global society that are happening against the backdrop of the Fourth Industrial Revolution and the race towards artificial intelligence that is evolving at a very fast pace.

This rapidly changing environment can be both a crisis and an opportunity. Since its foundation in 2017, QU Health has used this shift as a stepping stone for opportunities.

QU Health is the largest academic health cluster in the region. It includes five colleges under one umbrella: College of Health Sciences, College of Pharmacy, College of Medicine, College of Dental medicine and College of Nursing being our newest member. QU Health houses a community of health professions educators, clinicians, researchers, physician-scientists, and students united in a common goal: To transform health professions education in Qatar. The spirit of determination and collaboration catalyzes vibrant discoveries and innovative approaches to education, clinical care, and research and raises the bar with discovery and service in the region.

We envision our students as the leaders of tomorrow's health system, and we educate and train them accordingly. Partnership, collaboration and mutual respect are traits that define the relationship between faculty and students and that shape the culture that we strive to build.

Prof. Asma Al Thani

VP of Health and Medical Sciences

## VISION

To be recognized regionally for excellence in interprofessional health education and interdisciplinary health research; a first choice for students and scholars, and a national catalyst for innovation in the field

## GOAL

Transformation of Health Professions Education in Qatar

## MISSION

National provider of higher education in health and medicine

High quality interdisciplinary programs to prepare competent graduates capable of shaping the future of healthcare in Qatar

Synergy in teaching, research, and outreach to advance knowledge in the field

Continuous preparedness to address local and regional challenges, and contribute to population health in Qatar

## STRATEGIC OBJECTIVES

Quality and Integration of Health Professions Education

Integration between Health Professions Education and Research

Integrated QU Health Campus

University Hospital System

QU Health Market Branding
